1. EUPHA update

The Vienna Declaration

Linked to the Vienna 2016 conference, EUPHA and the Austrian Public Health Association published a Declaration reiterating the importance of the Ottawa Charter, adopted 30 years ago. This Declaration was supported by EPHA, EuroHealthNet, ASPHER, EuSPR, European Observatory and WFPHA and co-signed by 15 national associations (Armenia, Belgium, Bulgaria, Denmark, France, Germany, Hungary, Italy, Lithuania, Malta, Netherlands, Poland, Spain, Sweden and the United Kingdom). During Vienna 2016, over 150 conference delegates from 29 countries also indicated their support for the Vienna Declaration.

Changes in EUPHA Sections

The **EUPHA section on Health promotion** has elected a new president: Dr Luis Saboga Nunes from Portugal has taken over from Dr Christiane Stock from Denmark. We want to thank Christiane for her wonderful work for EUPHA and for the area of health promotion.

The **EUPHA section on Public health practice and policy** has elected a new president: Dr Marleen Bekker from the Netherlands has taken over from Dr Kai Michelsen from the Netherlands. We want to thank Kai for his wonderful work for EUPHA and the area of practice and policy.

The **EUPHA section on Social security, work and health** has elected a new president: Dr Gunnel Hensing from Sweden has taken over from Prof. Kristina Alexanderson from Sweden. Kristina has also stepped down as Section Council representative in the EUPHA Executive Council. We want to thank Kristina for her wonderful work and support for EUPHA and for setting up the section on Social security, work and health.

Changes in the Executive Council

Dr Natasha Azzopardi Muscat from Malta has taken over presidency from Prof. Martin McKee. Martin will stay on as past president of EUPHA and will continue to support EUPHA.

Dr Iveta Nagyova from Slovakia has taken over as section council representative from Prof. Kristina Alexanderson.

Prof. Carlo Signorelli from Italy has taken over as treasurer from Dr Markus Kaufmann from Switzerland.

Dr Julian Mamo has stepped down as representative of the International Conference Council.

Emma Honkala is a new member of the Executive Council representing EUPHANxt.

2. European Public Health Conference

Vienna welcomed Europe and beyond to the 9th European Public Health Conference between 9 and 12 November 2016. Almost 1,850 delegates from over 70 countries gathered to discuss and debate the state of global and European health from the perspective of research, methods and practices. The conference included 7 plenary sessions, 20 pre-conferences, 76 workshops, 44 oral sessions, 40 pitch sessions and 20 poster walks.

Each year, the conference organisers award abstract prizes in three different categories.

The Ferenc Bojan memorial prize, which is awarded to the best presentation by a young public health professional, was awarded to:

Kayvan Bozorgmehr, University of Heidelberg

Multiple deprivation and distribution of vulnerable asylum-seekers: a small-area analysis in Germany

The prize for the highest scoring abstract was awarded to two submitters this year:

Kayvan Bozorgmehr, University Heidelberg

Multiple deprivation and distribution of vulnerable asylum-seekers: a small-area analysis in Germany

Co-authors: O Razum, J Szecsenyi, W Maier, C Stock

Average score: 6.250

Marina Karanikolos, European Observatory on Health Systems and Policies

Amenable mortality in the EU28 before and after the economic crisis

Co-authors: J Mackenbach, E Nolte, M McKee

Average score: 6.250

The prize for the best poster presentation was awarded to:

Andrea Serafini, University of Siena

Heavy costs of diabetic population in Central Italy for cardiovascular diseases hospitalization

3. European Journal of Public Health

The [European Journal of Public Health](#) is a multidisciplinary journal in the field of public health.

The EJPH is published bimonthly. The journal provides a forum for discussion and debate of current international public health issues with a focus on the European region. In 2016, the impact factor of the journal is at 2.751. The 5-year impact factor is 2.512.

The EJPH is the official journal of EUPHA.

4. Interesting news

Most breast and cervical cancer deaths occur in developing countries, yet many could be prevented with cost-effective interventions

By 2030, the number of women diagnosed with breast cancer worldwide could almost double to 3.2 million a year unless urgent action is taken. Routine HPV vaccination of girls in the world's poorest countries over the next 4 years could prevent 600,000 future cervical cancer deaths, say researchers.

Social media proves effective as a tool for antimicrobial stewardship

A new study examines the use of social media platforms to inform young physicians about proper use of antimicrobial agents such as antibiotics. Currently, as much as 50 percent of all antibiotic use is inappropriate, leading to such unintended consequences such as antibiotic toxicity and increased antimicrobial resistance. Ensuring optimal use of antibiotics continues to be a central public health concern, and medical residents are a central focus of efforts to improve education in this field. But the question remains as to the best way to reach them.

JA-CHRODIS Final Conference

Registrations are now open for the final conference of JA-CHRODIS, which will be held on the 27-28 February 2017, at the Thon City Centre Hotel, Brussels.

The one-and-a-half day event will focus on JA-CHRODIS work and outputs and on the bigger picture of the challenge of chronic diseases across Europe. High level speakers, including European Commissioner for Health and Food Safety Vytenis Andriukaitis, will explore how the outcomes of this European collaboration can be used and taken up.

JA-CHRODIS's aim is to contribute to reducing the burden of chronic diseases and to promoting healthy living and active ageing in Europe. Partners gathered highly promising and cost-effective good practices focusing on health promotion and primary prevention as well as the management of multimorbidity and diabetes, with a view to facilitate their exchange and transfer between European countries and regions.

For more information and to register for the final conference, please click [here](#).

Panel on implications of behavioural policy-making in health promotion

At the third International Conference on Public Policy to be held in Singapore, June 28-30, 2017, we are organizing a panel on 'implications of behavioural policy-making in health promotion'.

This panel aims to bring together 'behavioural insights' from political scientists and public health experts from Asia, Australia, Europe and the US. Invited papers may analyse countries' health promotion profiles, comparing international case studies of nudge-based health promotion or reflecting broader implications of the 'behavioural turn'. Three research-guiding questions are of particular interest: What are the underlying assumptions when it comes to behavioural policy-making with regard to healthy lifestyles and risk avoidance? Are there cross-sectorial overlappings and intersections between approaches of behavioural health promotion and adjacent policy fields? Who are the policy-makers of behavioural health promotion and what are their interests?

You are cordially invited to submit a paper proposal on any of these topics (Please find a call for paper attached). This can be done until January 15th, 2017.

For more information on the panel (T17aP09), see

<http://www.ippapublicpolicy.org/conference/icpp-3-singapore-2017/panel-list/7#topic24>

For information on the conference, see

Health at the centre of Sustainable Development

EuroHealthnet explains how health, sustainability and equity are linked, and how integrated, innovative health promotion policy is essential to meet sustainable development goals.

News release PR_2016_18
24 November 2016

This week, many health ministers, mayors and senior policy makers met at the 9th WHO Global Conference 'Promoting Health in the Sustainable Development Goals: Health for all and all for health' in Shanghai to discuss how health is central to the achievement of the Sustainable Development Goals. It provided guidance on how health promotion and the development of healthy populations, communities and environments can be integrated into national and international responses to the international goals. Conclusions are presented in the 'Shanghai Declaration'.

This Declaration follows on the Ottawa Charter for Health Promotion, which was established 30 years ago, with conferences meeting every five years since then to consider past results and future challenges for global health. This edition focusses on sustainability, and ensuring no-one is left behind. Caroline Costongs, EuroHealthNet Managing Director who had the honour of delivering a key note speech at the plenary today, emphasised the need for collaborative inter-sectoral actions:

"There is a clear link between health, sustainability, and equity. Our lifestyles impact our health and well-being, as well as the environment. Economic development is accelerating human impact on the planet with the negative consequences falling disproportionately on low socio-economic groups and on those living in poor conditions and deprived neighbourhoods. Promoting good health across all sectors of society creates healthy lifestyles, populations, communities and environments, enabling sustainable growth and development for all"

Discussing how responses should be developed, and reflecting on the recent publication of the European Commission's Communication entitled 'Next steps for a sustainable European future - European action for sustainability', she continued:

"The European response to the SDGs should demonstrate a clear willingness for change and outline concrete steps for implementation. Ensuring health equity and addressing the causes of poor health must be a core component of that. EuroHealthNet has developed the REJUVENATE framework, explaining ten essential actions for the coming decade to improve health and help implementing the 2030 agenda for sustainable development."

New and innovative models, which consider the interaction between health, environment, and equity are needed to enable healthy, sustainable lifestyles. Work, led by EuroHealthNet, is already underway in this area thanks to the four-year, EC-Funded Horizon 2020 'INHERIT' project (inherit.eu) which looks at health equity, and how it relates to sustainable consuming, moving and living.

5. Upcoming courses and conferences

Going International is the first source for finding courses, seminars, congresses and other events in the fields of medicine & health. Going International is Europe's biggest service provider and information platform and serves as an interface between organisers and participants of events. Going International is an official partner of EUPHA.

7. European Commission news

Public Consultation on the mid-term evaluation of the 3rd Health Programme (2014-2020) opens today!

Being nearly at the half-way point of the 3rd Health Programme which runs from 2014 to 2020, the Commission would like to evaluate whether it is meeting its objectives and whether there is room for improvement.

As part of the mid-term evaluation, we seek to gather views and experiences from a wide range of stakeholders – not only the organisations and individuals directly involved in or benefitting from the activities of the Programme, but also wider stakeholder groups and individuals interested in health policy, public health, and/or healthcare in Europe.

Does this describe you? If so, we invite you to [complete the online form](#) by **23 February 2017**.

The results of the public consultation will be used together with other evidence to inform the mid-term evaluation of the Third Health Programme. The European Commission will publish the results of the evaluation including those of the consultation, and will transmit to the European Parliament and to the Council by mid-2017.

9. WHO news

WHO release's Innov8 Approach for Reviewing National Health Programmes to Leave No One Behind: Technical Handbook

“Leaving no one behind” is at the forefront of discussions on the 2030 Sustainable Development Agenda. Yet stakeholders at all levels are grappling with the question of how to concretely do just that. The Innov8 Approach for Reviewing National Health Programmes to Leave No One Behind is an eight-step review process geared towards this very aim. Innov8 is a resource that supports operationalization of the SDGs and the progressive realization of universal health coverage and the right to health. It does this by identifying ways to make concrete, meaningful and evidence-based programmatic action to make health programmes more equity-oriented, rights-based and gender responsive, while addressing critical social determinants of health influencing programme effectiveness and outcomes.

The Innov8 Technical Handbook is a user-friendly resource that includes background readings, country examples and analytical activities to support a programmatic review process. The Technical Handbook will be complemented by the release of wider set of materials currently under development by WHO as part of the Innov8 resource package.

Global monitoring system for action on the social determinants of health (SDH) - web-based consultation

World Health Organization

Further Information: http://www.who.int/social_determinants/monitoring-consultation/en/

Deadline: 31 December 2016

The World Health Organization (WHO) is holding a global consultation on its proposed global monitoring system for action on the social determinants of health (SDH). To support submissions on the monitoring system, this consultation paper aims:

To introduce the monitoring of action on the SDH (pp 1-4);

To present the proposed monitoring framework (pp 4-6);

To present the proposed core basket of indicators (pp 6-13); and

To present the rationale and evidence base for the measurement concepts (pp 14-18).

Member States and any other organizations or individuals are invited to comment on any aspect of the proposed framework and indicators that are presented in this consultation paper. However, WHO especially welcomes feedback on the following questions:

- Do the framework objectives cover the pledges made in the *Rio Political Declaration on the Social Determinants of Health*?

- Do you recommend other indicators – either as preferred indicator or place-holder indicators?

- Do you recommend other data sources for proposed indicators?
